5 Travel, in other words, is a basic human desire. But do we travel just for fun? I'm afraid not. Actually, getting away is an essential habit of effective thinking. Thanks to modern **aviation**, we can now move through space at an inhuman speed. For the first time in human history, we can outrun the sun and move from one **hemisphere** to another in a single day. Of course, it's not enough to simply get on a plane. If we want to realize the creative benefits of travel, then we have to rethink its overall purpose. Most people, after all, escape to Paris so they don't have to think about those troubles they left behind. But here's the irony: Our mind is most likely to **solve** our most **stubborn** problems while we are sitting in a Left Bank café. So, instead of **contemplating** that buttery dessert, we should be conscious of those domestic issues we just can't solve.

6 The larger lesson, though, is that our thoughts are **saturated** with the familiar. The brain is a space of near-**infinite** possibility, which means that it spends a lot of time and energy choosing what not to notice. As a result, creativity is traded away for efficiency; we think in **finite**, literal **prose**, not symbolic **verse**. A bit of distance, however, helps **loosen** the **cognitive** chains that **imprison** us, making it easier to **mingle** the new with the old; the **mundane** is grasped from a slightly more abstract perspective. According to research, the experience of an exotic culture **endows** us with a valuable open-mindedness, making it easier to realize that even a **trivial** thing can have multiple

meanings. Take head movement, which is commonly used to communicate positive versus negative response, as an example. In most cultures, nodding one's head denotes positivity, meaning "yes", and shaking the head is associated with negativity, meaning "no". In Bulgaria, however, this response pattern is reversed – that is, head shaking means "yes" and head nodding means "no".

U 4

3 Between labor and play stands work. People are labeled as workers if their personal interests **coincide** with the jobs society pays them to do; what is necessary labor from the point of view of society is **voluntary** play from the individual's personal point of view. Whether a job is to be **designated** as labor or work depends, not on the job itself, but on the tastes of the individual who undertakes it. The difference does not, for example, **correlate** with the difference between a **manual** and mental job or between jobs with low or high income; a gardener covered in dirt in a greenhouse may be a worker while a well-dressed city **mayor** may prove to be an unhappy laborer!

4 Whether people are workers or laborers can be seen from their attitude toward leisure. To workers, leisure means simply the hours they need to relax and rest in order to work efficiently. Workers are therefore more likely to dedicate more time to working, taking too little leisure rather than too much. To laborers, on the other hand, leisure means **autonomy** from compulsion, so it is natural for them to imagine that the fewer hours they have to spend laboring, and the more hours they have free for play, the better.

8 All in all, people's attitude toward their work determines everything. Whatever the job, people who enjoy their work find time passes quickly. They **hurl** their passion into their work, be it physical like the work of a smith, or more mental like that of a scientist or an artist. Even purely mental work can **suffice** as an **outlet**, as **aptly** expressed by the phrase "sinking one's teeth into a problem".

9 Eventually, everyone has to find a job and earn a living. Laborers are slaving away at a job they don't enjoy for a **monetary** reward, waiting all day until they go home and play. But while laborers are counting down the hours, workers are energized and focused, taking **optimum** pleasure in the task at hand. By choosing a job that is both useful to society and personally fulfilling, workers maintain a simultaneous sense of purpose and enthusiasm that improves their whole lives. So in the end, whatever job you choose, you must **contend** with this essential question: Will you be a laborer or a worker?

A annoyances	**F** endows	**K** offsets
B cognitive	**G** immerse	**L** positivity
C console	**H** loosen	**M** recipe
D denoting	**I** luncheon	**N** trivial
E embracing	**J** nuances	**O** tropical

The benefits of travel go beyond making memories and meeting new people. Staying away from the 1) trivial (N) things of daily life and exploring a new place can have a remarkably positive impact on your emotional well-being and your 2) cognitive (B) powers.

Travel can improve your emotional well-being in two aspects. First, changing your daily routine, for example, taking a trip to a nearby town on a weekend day, can help 3) console (C) your mind and deal with the daily 4) annoyances (A). Second, physical exercise is known to improve emotional well-being and travel offers plenty of opportunities to get active. Getting to know a new destination by 5) embracing (E) the great outdoors can boost energy levels and improve your mood.

Travel can also improve your cognitive powers due to the exposure to different cultures. Whether you venture abroad or simply to the next town over, a trip away from home can help enhance your 6) positivity (L) and reveal a world of possibilities beyond your daily perspective. Something as simple as learning a new 7) recipe (M) or changing the way you spend your downtime can have a dramatic effect on your well-being. It's been proven that new experiences – particularly ones that allow you to 8) immerse (G) yourself in a different culture – improve the performance of your brain, 9) loosen (H) the restrictions, and increase creativity.

Evidently, travel itself 10) endows (F) you with the freedom to do what you love, to rest, and to try something new. For many people, travel is not simply an enjoyable recreation, but an essential part of maintaining a positive mentality and improving cognitive abilities.

Banked cloze

5 Fill in the blanks by selecting suitable words from the word bank. You may not use any of the words more than once.

A	abolish	**F**	complaining	**K**	monetary
B	barrier	**G**	exhaustive	**L**	motion
C	bored	**H**	foster	**M**	notion
D	carrier	**I**	incentives	**N**	reflecting
E	clusters	**J**	indebted	**O**	refraining

According to a study conducted in the U.K., four out of every five employees are happy at work. Surprisingly, the study revealed that the 1) notion (M) that people are happy when they have a good salary, isn't true. So, what should people do to keep their spirits up and, at the same time, 2) foster (H) a sense of joy at work? Here are two suggestions which are believed to be important in achieving happiness at work.

Start with a positive outlook. Happiness is a state of mind, 3) reflecting (N) an attitude. Staying happy at work is totally based on your motivation and a positive outlook toward your job, not on 4) monetary (K) rewards or material gain. Always remembering the good aspects of the work and 5) refraining (O) from thinking about what makes you unhappy are important to happiness. Negativity and 6) complaining (F) about bad things are easy; it is looking at the bright side that is the difficult part of a job.

Challenge yourself. Rather than looking for help and 7) incentives (I) from other people, challenge yourself and take charge of your own growth professionally. Getting 8) bored (C) with work is one of the primary factors that cause people to switch jobs. So find new challenges and deal with them by making 9) exhaustive (G) plans and following them. It is a good idea to have help from your manager if you hit a(n) 10) barrier (B), but completely relying on someone for your career advancement is unwise.

Facing the problems and challenges at work and tackling them by yourself will give you a sense of accomplishment and help you achieve happiness at work.
